Celebrating Harmony Day

Today we got to celebrate Harmony Day. We started our day off with some orange playdough that Miss Jade had got for us, Miss Zoe added some wooden play material such as rolling pins and wooden cutters. We all got to participate as a group and loved the feel of the play dough and the texture of how it felt, we were able to roll it, stretch it out and make all sorts of shapes.

We also sat down as a group and looked at the World Flags, Miss Jade explained how we are all from different parts of the world but we are all one. The mini flags we got to share and take turns. We liked seeing all the flags and all the colours and patterns.

A favourite activity in our room was all the different multicultural dolls. We learnt how to take care of the babies and how some wore different outfits, we could take them for walks in the walker or carry them and even had some sit with us during our activities.

Miss Jade borrowed a book called "I'm Australian," this book shows countries from near and far and how many of us have made Australia "Our home." and also recognising our original countries.

Thank you all for a lovely day

Spontaneous Play

We have enjoyed exploring our room today.

We have thoroughly had fun playing with the wooden dolls house where Lucas liked playing with all the accessories.

Carter seemed to have like the dinosaurs he particularly had a favourite and that was the T-Rex and he tried to scare his friends going "Roaaarr." Philip also found an interest in the dinosaurs and he was able to play with a variety of them using our other resources provided.

Ellie and Penelope just adored the baby dolls they pretty much carried them throughout the morning even asking if they can have one each during rest time, it was so good to see them interacting and playing with each other.

Hudaa and Joanne decided to be builders and asked for the wooden tool set they were using the different tools to fix the "reading corner." They used the screw driver and the hammer and it was good to see them using the concept of problem solving and investigating.

We all find our puzzles to be such an exciting activity. We all try our best to figure out what piece goes to what and how they all match up. This shows how we can learn to transfer what we have learnt and how we are able to use our experimenting skills.

Analysis of learning

L/O1 Children have a strong identity-1.1

L/O2 Children are connected with and contribute to their World-2.1, 2.2,

L/O4 Children are confident and involved learners-4.1, 4.2, 4.3, 4.4

Reflection of the day

Learning all about Harmony Day and how we celebrate it from using different resources and materials such as our multicultural dolls, flags, orange play dough to reading a book.
