# Water Painting

With all this rainy weather around, we thought we would bring it into our art experience for today. Before the rain had hit, the children stood outside and watched as the grey clouds came over, they then noticed it was starting to softly rain and get heavier and heavier. As we came inside, we sung a couple of different songs that involved the rain as well as listening to the heavy sound on the rain. Today we continued with mother's day cards, but this time with water paints.

Each of the children sat at the table with Miss Taylah and done their water paintings one on one. As they chose which colours they wanted to use, Miss Taylah talked about each different colour. Some of the children repeating the colours. As the children placed the paint brush onto the paper, they watched as it created droplet, once they moved the brushes around, they could see the water droplet soak into the paper, and watched as the colours mixed together, making new and different colours.

# Inside Play

Seeing as today was a cold, rainy day the children had to play inside for the rest of the morning. Even though they weren't able to run and play outside all of the Jellyfish's seemed to have heaps of fun exploring all the different toys inside.

**Ethan** was extremely cheerful and energetic this morning, running around the classroom with a massive smile on his face, he had so much fun exploring all the different toys with his Jellyfish friends.

**Hannah** and **Ayden** really enjoyed stacking the blocks on top of another. They were both extremely clever, making the blocks balance as it got higher and higher.

**Tiffany** and **Isabella** both love sitting in our reading corner, each choosing books that they liked. They each flipped through the pages looking at all the illustrations.

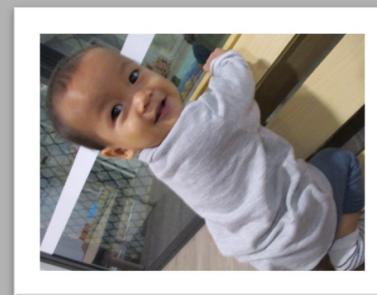

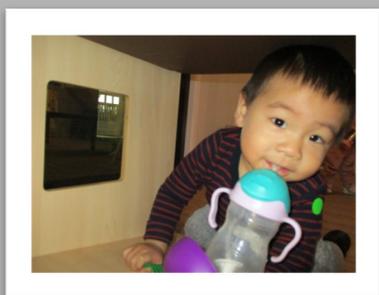

**Harvey** and **Archie** both love to explore the classroom, **Archie** also loves to sit on the carpet with the others and build with the blocks. Whereas, **Harvey** is a little more independent as will play by himself with all the different toys, he really loves the pretend food in home corner.

**Ariana** loved to hold Miss Zoe's hand as she walked around the classroom. She really likes to build with the magnetic sticks.

**Eleanor** arrived a little later in the morning, as soon as she was dropped off she began to play with all the other children. Playing on the wooden obstacle, playing with the blocks and reading many stories.

## Obstacle course fun!

As we spent our morning inside, the children really showed a great interest in the wooden obstacle course. **Archie**, **Harvey**, **Ethan**, **Tiffany** and **Ayden** explored the obstacle course in a range of different ways. **Tiffany** and **Ayden** liked to climb on the triangle side of the obstacle course, whereas **Archie** and **Harvey** enjoyed crawling through the tunnel side. **Ethan** and **Archie** thought it was very funny, playing peek a boo with each other. The wooden obstacle course was a great activity to keep the children happy and entertained while being stuck inside from the cold, rainy weather!

# Reflection of the day

The jellyfish children spent the day inside as it was cold and wet outside. They enjoyed the planned art experience and music that was playing through out the morning.

Towards lunch time the children started to get a little unsettled as they were getting hungry and tired and had been inside all morning, we ended up having lunch a little bit earlier to help the children settle. They were all happy as soon as they had their lunch.
