

Jellyfish's Daily Learning Story

13th of July 2021

Our Construction set up!

This week in the Jellyfish room we are focusing on transport such as cars, planes, boats, tractors, diggers and lots more! To start the busy morning off Miss Jade collected a bunch of different items that would make up a perfect construction site.

She found a puzzle road that she placed into the giant container as well as sand to represent the ground of a construction site. There were rocks and trees to show the surroundings and environment of the site that we were making. Miss Jade also found lots of diggers and tractors for the children to play with in our construction site.

This sensory activity was a perfect way to give the children an insight as to where tractors and diggers work in the real world.

Harvey and **Amal** loved pushing the tractors through the sandy construction site. Whereas **Archie** and **Weixuan** loved picking up the sand in there tractors and dumping it into the construction site. All the children had so much fun exploring Miss Jade amazing construction site for this morning experience.

Indoor Play

This morning we got to play with many activities in our room. Today **Olivia** and **Isabella** had fun in the home corner where they made many pretend yummy treats. **Weixuan** and **Aria** soon joined them as well and liked to stack the food on top of one another. **Aria** was able to grab the fork and pretend to eat a bowl of cereal.

Hannah liked to play in the obstacle course that we have in our room, she liked to go through the obstacle course like she was playing "hide and seek."

Amal and **Amelia** wanted to play with Miss Jade with the assorted cars we have in the room, we even put trailers on the back of our cars all lined up and ready to race.

Archie and **Harvey** began to play with our wooden puzzles they liked to try to attempt to put the right shapes in the correct shape holder, Miss Jade tried to even tell them the colours of the shapes.

Eleanor and **Ethan** played with the boat's puzzle they were able to learn to share the pieces while interacting with one another by taking turns.

Another activity our children liked to play with was the cupboard box where they were able to use it in many ways for different purposes.

Outdoor Play!

What a busy but eventful day in the Jellyfish room, the Jellyfish children had so much fun inside with Miss Jade's construction site as well as exploring all the toys inside. While Miss Vivian got the beds ready for the children Miss Zoe thought it would be the perfect opportunity to let them have a run outside before lunch.

Weixuan had so much fun playing with the giant bouncy ball, he would jump up and down just like it, he couldn't stop giggling.

Amal and **Archie** sat up at the table together and played with the building blocks, they stacked the blocks as high as they possibly could until they fell over.

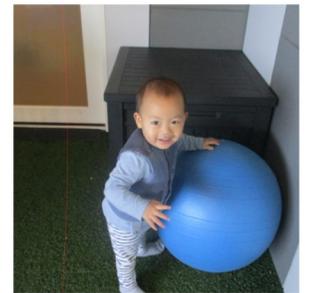

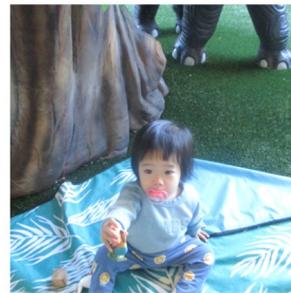

Harvey and **Eleanor** were showing Miss Zoe all the different animals they could see, they would hold them up to her and try and say what animal they were holding with Miss Zoe's help.

Isabella and **Amelia** had so much fun in the outdoor home corner, pretending to make all these different meals for each other.

Aria and **Hannah** loved climbing over the different obstacles, Hannah loved sitting in the car whereas Aria tried to climb over the bus.

Olivia had so much fun playing on the bikes, racing around the yard as fast as she possibly could!

Group time

As we are focusing on Construction in our jellyfish room Miss Zoe found the perfect book to read to us during our group time this morning.

Our book was about "Roadworks." We are very familiar with the different trucks, bull dozers and diggers and what they are made to do. We learnt how to pick up and tip the stones and dirt, how to care for our road and how to look after it, we also learnt new words such as "Crash! Roar! And Thump!

We all liked this particular book and got so much enjoyment out of it. I feel like in our Jelly fish room that this book was so catchy and a lot of words rhymed for our children which caught their attention.

Analysis of learning

Fine motor skills

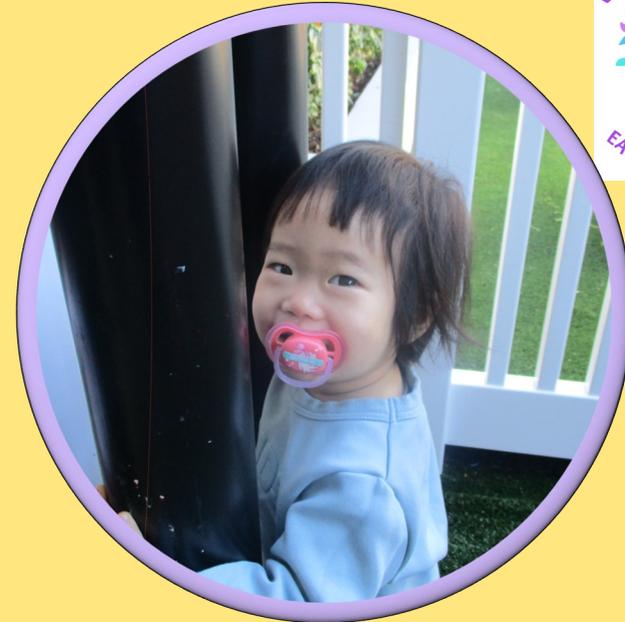

Gross motor skills

Hand-eye coordination

Sense of belonging

Interactions

Participation

Reflection of the day

We have had a good day in our Jellyfish room and we are just getting use to having Miss Jade in our room, we also had Miss Vivian as well who is full of energy.

As we are focusing on our "Construction activities," this gives us a good understanding of been able to communicate as a group and form interactions with one another.
