

STINGRAY DAILY STORY

WEEKLY TOPIC:
SCIENCE WEEK

OUTDOOR PLAY

During outdoor play the Spencer and Yoonu engaged in a range of activities while we waited for our other friends who missed out on outdoor play today. Spencer decided to play with the dinosaurs. Miss Briohny sat with him and they sorted them into big dinosaurs and little dinosaurs. He also sat with some older children and made towers from the blocks on the mat, carefully placing each piece to see how high he could make it go. Yoonu decided he would play with the lego blocks, stacking them, together to make different shapes. He also played on the playground, hiding from Miss Stacey and giggling when she would find him.

WATER COLOUR PAINTING

We continued with our topic of Science today by creating some water coloured paintings. Selecting one of the water colours they started spreading it across their paper. As they worked they noticed that the colours were showing a picture underneath. Before the children started painting Miss Briohny used a candle to draw the children's names onto the paper and as the water covered the paper it left the candle drawing colourless. Thomas was quite surprised when he noticed his name under his painting.

Our second Science activity this morning was colour mixing in ziplock bags. On the table Miss Briohny placed three Ziplock bags with red, yellow and blue paint in them. As the children sat at the table they used their fingers to move the paint around on the inside of the bags. As they spread the paint around it mixed the two colours together, creating green, orange and purple. Once they had mixed the colours together they were able to use their fingers to create drawings in the paint.

This activity provided the children with a new media in which to create their art, resulting in clean hands and a sensory experience.

COLOUR MIXING BAGS

MUSIC

WINDMILL

Mr Brendan came this morning for our music class. On the mat the children recalled how to do their different movements from claps, to stamping their feet and the drum sound with their mouths. Once they had remembered the different movements they were ready to put them into action with their first song. Following along to the music they were able to add in the different movements at different times and freezing when the music stopped. We only had a short session today as the children got distracted.

GROUP TIME

During group time this morning we continued with Science week by participating in a new experiment. Today's experiment involved Skittles. Miss Briohny spread out some skittle around the rim of the plate before joining the children on the mat. As a group we sat around the mirror table watching the skittles in the plate. To start the experiment Miss Briohny poured some water into the plate so that it covered the bottom of the skittles. Then the magic happened, the children noticed that the water under the skittles started to change colour. As we watched the colour from the skittle melted into the water, slipping away from the skittles and creating a rainbow effect. As our experiment finished we noticed that the water in the plate was now the same colour as the Skittles. Miss Briohny picked up one of the skittles and showed the children how the bottom of the skittle was now white, whereas the top of the skittle was coloured.

Analysis of learning

LEARNING OUTCOMES ACHIEVED: LO1, 1.1, 1.2, 1.3, LO2, 2.1, 2.3, LO3, 3.1, LO4, 4.1, 4.2, 4.4, LO5, 5.1, 5.2, 5.3

Reflection of the day

Today was day two of our NAIDOC WEEK activities. This morning the children helped Miss Briohny to make natural paint from strawberries, raspberries, blueberries and turmeric powder. The children then used these paints for painting. They also spent the day playing with the playdough and playdough mats, the memory match activity and the natural tray with Aussie animals. During our group time we talked about the Aboriginal and Torres Strait Islander flag as well as some examples of bush tucker.
