

Jellyfish's Daily Learning Story

16th of July 2021

Science Experience

Yayyy! What an exciting week ahead for our Jellyfish room as we are celebrating "Science Week."

This morning Miss Taylah had set up an amazing experience for us to explore. She had Bi-Carb soda which she placed in muffin trays with food colouring and using eye droppers we added white vinegar. Miss Jade had brought along some metallic grey and coral slime and mini diggers and trucks for us to use.

Archie was the first to come along and see what all the excitement was. Miss Jade gave him a eye dropper and away he went mixing the white vinegar to the Bi-carb soda his reaction when he had see the blue food colouring pop through was priceless he absolutely love it and seeing all the foam bubble through.

Amal and **Eleanor** were so engaged in this group activity and they liked to experience the eye droppers with the different colours and seeing the reaction when the bubbles would come to life.

Amelia and **Tabitha** were more curious as to how the slime felt, **Amelia** was a bit hesitant but after seeing **Tabitha** play with it and seeing it through her hands she wanted to touch it too. Miss Zoe showed our children how fun the slime was too. **Amelia** just didn't like it when the slime would stick to her.

Ariana and **Aria** stood back from a while to what their friends were doing and soon joined the group too they were more interested in playing the mini trucks and diggers pulling them into the slime and the foam blocks.

This activity was such a good start to the week and we cant wait to do more fun things throughout the week.

Group Time

Happy Monday everyone, with the children extremely calm to start the busy week off we decided to include group time into our morning. After finishing the science experiment for Science Week, us educators thought it would be the perfect opportunity to let the children relax and listen to a story.

We read a story about a lion and a mouse, the children always get extremely excited reading stories about animals. They were all engaged in the story, listening to myself read the book to them. They all interacted with the story as well, making all the different sounds to what animals we were talking about!

Outside Play

With the children having an amazing morning outside, we decided to let them stay outdoors and have free play exploring all the different toys that we have to offer.

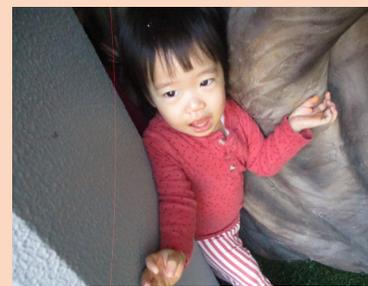

Archie was very adventurous this morning, he loved playing on the bus climbing frame. Using both his arms and legs to climb over the frame all by himself. He loved playing on the climbing frame the entire time he had a massive smile on his face.

Amal and **Amelia** were happily playing together this morning, also playing on the bus climbing frame with **Archie**. But their favourite activity this morning was completing all the puzzles set out on the table.

Ariana had so much fun playing independently on the car frame, she was pretending to drive the car turning the stirring wheel left to right!

Tabitha and **Eleanor** were happily exploring the entire yard when they both arrived they also loved playing with all the puzzles set out. As well as exploring the animals that are set up around their small yard!

Analysis of learning

Creativeness	Building Strong Relationships
Sense of belonging	Cognitive Development
Communication	Verbal Communication
Recognition	
Fine motor skills	
Gross motor skills	

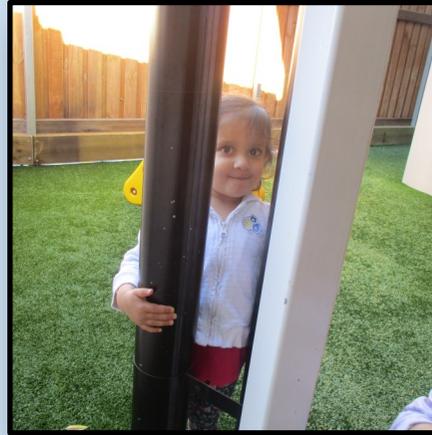

Reflection of the day

Overall today was the perfect way to start the week off, with the children extremely settled they all really enjoyed their morning. The first Science Week experiment was a success with all of them joining in and giving it a go we can't wait for the rest of the week.

Photos of the day

Sleep, eat chart
